COUNTY INTERGRATED HOSPITAL MANAGEMENT INFORMATION SYSTEM REQUIREMENTS

1. Introduction

The County Government of Bomet seeks to procure a web-based County Integrated Hospital Management Information System to improve healthcare services delivery and in the management of its health facilities. The project involves the implementation of the HMIS in the county referral hospital and subsequently the sub county level hospitals at the County.

County Government of Bomet has one (1) Referral hospital – Longisa in Bomet East, Six (6) sub county hospitals
- *Konoin Sub-county - Cheptalal and Koiwa SCH*
- *Bomet Central – Kapkoros SCH*
- *Bomet East – Tegat SCH*
- *Chepalungu – Sigor SCH*
- *Sotik – Ndanai SCH*

There are twenty three (23) Health Centres and one hundred and ten (110) dispensaries. The system will be used by the Department of Medical Services having staff population of approximately 1,100 of which approximately 330 staff are based at Longisa Referral Hospital.

The initial implementation of the CHMIS will be at the Longisa Referral Hospital. The system, being web based, should be flexible and scalable to allow onboarding of sub county hospitals and other health facilities as and when their ICT infrastructure allows. It is expected that the vendor will provide sufficient training to both the users and technical staff in the rollout at Longisa Referral Hospital so that these teams will then play a lead role in the rollout to the other health facilities.

The proposed modules will be availed to the health facilities on a need basis therefore the HMIS should have that flexibility.

The system will be hosted internally at the Longisa Referral and backed up at the County Headquarters data center

It is a mandatory requirement that that bidders respond to the to this tender both on the IFMS Portal and manually through the tender box.
